(Examiner/SPE Signature) (Applicant/	Applicant's Representative Signature	gnature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner contacted Mr. Mattingly to determine if there was an applicant initiated reason that the Board Decision had not been processed to date. Mr. Mattingly responded that he was aware of no reason why the Board decision had not been addressed by the PTO. The examiner informed the applicant the an allowance was being considered, but that the allowable subject matter cited by the board although sufficient to overcome the cited art was not sufficient to overcome art identified in a current search by the examiner. The examiner suggested that the applicant place the comparing of the trading identifier and the e-mail address feature, as is defined in claim 1, into the added independent claims to differentiate the instant claims from the prior art. Mr. Mattingly noted that the combination of status indicators along with the identifier that is related to all the indicators is sufficient to overcome the prior art, Mr. Mattingly pointed to Figures 8-14 of the instant application. The examiner agreed to search complete the search with this nuance being considered..
